Multi Actor Approach – Eligibility Condition (1/2)

Multi-Actor Approach (MAA) in Cluster 6

NEW

Multi-Actor requirements can be found on:

[wp-9-food-bioeconomy-natural-resources-agriculture-and-environment_horizon-2021-2022_en.pdf \(europa.eu\)](#) page 19-21

1. The MAA is an **integral part of the topic text** and is counted as **criterion for excellence**:

- Clarity and pertinence of the project's objectives (*=> focus on needs and opportunities of end-users of project results*)
- Soundness of the proposed methodology, including open science practices including sharing and management of research outputs and engagement of citizens, civil society and end users where appropriate (*=> focus on working according to MAA and plenty of broad communication and dissemination, in particular to end-users of project results*)

2. The MAA = **eligibility criterion** as indicated in the topic table: « proposals must use the MAA »

3. IMPACT of MA project: outcomes are **more demand-driven**, reliable and **relevant to society**

4. End-users/practitioners and intermediates are to be involved, **not as a study-object**, but to use their practical and local knowledge and/or entrepreneurial skills to develop solutions and **create 'co-ownership' of results for (end-) users and practitioners**

~~APPLIED RESEARCH~~

5. This will **speed up the acceptance and take-up of new ideas, approaches and solutions** developed in the project

Multi Actor Approach – Eligibility Condition (2/2)

The Multi-Actor requirements

1. Project objectives must be targeting the needs and opportunities of end-users of results
2. The project concept and composition of the consortium must reflect a balanced choice of key relevant actors with complementary knowledge, able to ensure broad implementation. All actors actively involved all over the whole course of the project as from the planning phase
3. Cross-fertilisation during the project must integrate tacit and practical knowledge
4. Use methods to facilitate the multi-actor engagement process
5. Demonstrate added value: how does the project complement existing research and best practices?
6. Results must be practical, easily understandable and feed into the most used dissemination channels for end-users
7. For EU wide communication: “practice abstracts” in the common EIP format
8. Involve as much as possible local interactive innovation groups (EIP-AGRI Operational Groups under the CAP)
